Github

## PROFILE

One story about writing creative briefs for birdseed was enough to make me reconsider using my advertising degree. I loved building and problem solving in a fast paced environment, but needed a different avenue. After finding development, the more I did, the more I excited I got. I continue to feel that way 2+ years later with more than a year of full time experience.

## SKILLS

Experienced in: HTML5, CSS3, Php, React, Version Control, Adobe Creative Suite
Familiar with: Vanilla Javascript, JQuery, React Native

## EXPERIENCE

### Web Developer, Stab Magazine — June 2020 — Present

*Stab is a surf focused online publication with over half a million monthly views.* Developed and launched entirely new Wordpress site. Handled transfer of 14,000 articles between CMS platforms. Enabled paywall with 10,000 paying subscribers. Worked with live scoring events, Shopify, Google Analytics and ad implementation as well. stabmag.com & surf100.tv

### Web & Mobile Developer, Maya Care, llc. — May 2020

*Maya is an app for caretakers to keep track of patients daily habits, bodily functions and experiences.* Developed components for the mobile app that was accepted into the Android & Apple Store. getmayacare.com/learn
